

Your Partner in Flow Chemistry

Welcoming Our New PhD Candidates

We're pleased to introduce two promising researchers who have recently joined academic collaborations involving Ehrfeld:

Robert Mönch just started his PhD at the TU Hamburg at the Institute of Technical Biocatalysis inherited by Prof. Andreas Liese. In the scope of his dissertation Robert is going to address the development of biocatalysts for amino-acid synthesis and model-based scale-up in an external R&D Projekt.

Cinthia Krämer joined the Ruhr University Bochum (RUB) in April at the Chair of Fluid Process Engineering, under the guidance of Prof. Marcus Grünewald. Cinthia's research centers on automating the characterization of Ehrfeld's milli- and microstructured mixers – driving efficiency and innovation in process development.

Vision, Mission & Trust – Shaping Our Future Together

We are excited to share that, grounded in the shared values of our team, we have successfully developed a new vision and defined our mission for the next five years. This important milestone was achieved during our recent two-day retreat.

Our time together was not only productive but also deeply inspiring, as we aligned our goals and laid the foundation for our future direction.

A heartfelt thank you goes to Prof. Britta Bolzern-Konrad for her expert facilitation, thoughtful structuring of the workshop, and insightful guidance through the Return on Trust method.

Stay connected with us as we share upcoming developments and the exciting changes that lie ahead!

Upcoming conferences in September

Ehrfeld is gearing up for a busy September:

18th - 19th September: [12th Flow Chemistry India](#)
in Ahmedabad, India

24th - 25th September: [16th CFRT](#) in Prague, Czech Republic

We are looking forward to connecting with you in person.
Additional events can be found on our [website](#).
